Which DPI resources have you used in your effort to reach your district or school’s school mental health goals?

- [The Wisconsin School Mental Health Framework](#)
- [The Roadmap for School Mental Health Improvement](#)
- [Trauma Sensitive Schools Online Professional Development Series](#)
- [Social and Emotional Learning Resources](#)
- [Mental Health Literacy Units](#)
- [Mental Health Referral pathways guidance or modules](#)
- [Screening Resource Guide](#) or [Screening Action Planning Checklist](#)
- [Suicide Prevention Resources](#)
- [Bullying Prevention Toolkit](#)

Large district (over 2,500 students): Pertaining to potential future School-Based Mental Health Services State funding, envision if your district could expend funds at a hypothetical rate of \$75/student for uses listed above and how it might do so.

- Our district could **expend all the funds** at this increased amount (above current \$31/student) for mental health services.
 - Please describe:
- Our district could **expend a portion** of the increased amount (above current \$31/student) for mental health services.
 - Please describe:
- Our district would not be able to spend any additional mental health services funding above the current \$31/student amount.

Medium district (500-2,500 students): Pertaining to potential future School-Based Mental Health Services State funding, envision if your district could expend funds at a hypothetical rate of \$100,000/year for uses listed above and how it might do so.

- Our district could **expend all the funds** at this increased amount (above current \$31/student) for mental health services.
 - Please describe:
- Our district could **expend a portion** of the increased amount (above current \$31/student) for mental health services.
 - Please describe:
- Our district would not be able to spend any additional mental health services funding above the current \$31/student amount.

Small district (Fewer than 500 students): Pertaining to potential future School-Based Mental Health Services State funding, envision if your district could expend funds at a hypothetical rate of \$100,000/year for uses listed above and how it might do so.

- Our district could **expend all the funds** at this increased amount (above current \$31/student) for mental health services.
 - Please describe:
- Our district could **expend a portion** of the increased amount (above current \$31/student) for mental health services.
 - Please describe:
- Our district would not be able to spend any additional mental health services funding above the current \$31/student amount.
